

Trabzon University (TU) is aware of the importance of practical application in teaching and learning process and therefore most of the applied degree programmes at TU have a compulsory traineeship period in their curriculum, which is a prerequisite for graduation. Especially pre-service teachers are required to perform a total of two terms traineeship in public schools, till the end of the fourth year. Each of these two courses requires a term-long workload in schools. As soon as this is achieved, the student gets a pass grade for this course.

The details related to the internship periods of different degree programmes can be found in their course catalog.
